

HomeCare Answers

Since opening for business in 2000, our experienced staff has coded hundreds of thousands of files. We are confident our services will benefit your home care business!

HomeCareAnswers.com

Maximize Your Revenue

Since 2014 we've helped our clients realize an additional \$33.95 million in otherwise unclaimed revenue through our OASIS audits and coding services. This year alone we have helped our agencies uncover \$5 million of additional, otherwise unclaimed revenue.

We are the PDGM experts. We've built and released our own PDGM calculator which includes the pre/post audit calculations, LUPA Threshold, HIPPS, and Case Mix weight for each 30 day period on every chart we review. When combined with our expertise in OASIS Review, diagnosis coding, Home Health Regulations, and data analytics, your agency will not only survive, but will thrive! We

400% Return on Investment

provide the information for each chart to review in an easy, convenient way so clinicians can review before our accepting our recommended changes. To our knowledge, we're the only company offering this detailed level of analysis! We provide industry leading data analytics to help you get the best data to make the best decisions. We can provide OASIS analysis to the clinician level to help identify training opportunities, knowledge gaps, and QAPI initiatives along with comprehensive analysis of key PDGM benchmarks.

Safety Through Compliance

Our Suite of Services help you maintain compliance from referral to discharge. We help reduce the headache in the case of RCD, Probe and Educate, Pre Claim Review or ADR. We ensure accuracy so that the chart is ready upon submission. This reduces the headache of ADR when and if they come. We also have ADR and denial appeals services available to help at an additional charge.

Lightning Fast Processing

We promise file turnaround in one business day, and have a 93% return rate in that timeframe. This, in addition to our accuracy, is what separates us from the competition.

Improved Star Ratings

Star ratings are essential to new client acquisition and obtaining physician referrals. Low star ratings are often caused by inaccurate OASIS reviews. Discharges are also an important part of star rating improvement. People rely on star ratings to determine whether to trust their loved ones to you for home care. Our partnership helps agencies take the credit they deserve for the good work they've done to earn high star ratings. Don't let a few incorrect OASIS answers ruin a five-star rating!

There's More!

In addition to all those benefits, Home Care Answers' services relieves work loads from administrators, case managers, and directors of nursing. Reducing these administrative tasks allows you to see more patients which further increases revenue and maximizes labor.

Not only is this cost saving, it is revenue gaining. Or in other words, a profit center. Anytime you can have support services be a cost saver and a profit center, that is a big business win.

Free Trial

Home Care Answers offers a free trial for new clients. We will process a sampling of files for you for free so you can see the benefits for yourself! The trial includes the following:

Up to 10 OASIS Files with Reviews

-or-

Up to 5 Files with Plan of Care Build

Referral Program

Many of our clients are so satisfied with our services that they wish to refer colleagues! As a thank you, we offer a 3-month discount rate that can stack up for each client successfully referred. For more details, contact a member of our staff.
