SUMMARY OF FINDINGS – TRIAL SERVICE (Example #1)

OVERVIEW

The information presented below is based on audit results of 15 patient charts provided by Generic Home Health #1. As a basis for measuring the impact of our services we perform a pre-review calculation to determine the billable value of the OASIS as it was originally delivered to Home Care Answers (HCA). Following a thorough review of the patient chart and OASIS we make suggested coding corrections and OASIS recommendations. A post-review calculation is then performed. This new calculation takes into account our recommended coding and OASIS changes. These two calculations form the basis for the data presented below.

Any coding and OASIS suggestions made by Home Care Answers must be accepted and implemented by the signing clinician in order for Generic Home Health #1 to benefit from our recommendations.

BELLEVUE – SUMMARY OF FINANCIALS

Pre-review value: \$ 55,058.34
Post-review value: \$ 60,597.73
Financial gain: \$ 5,539.39
Avg. gain per file: \$ 369.29
Case-mix gain: 0.14798

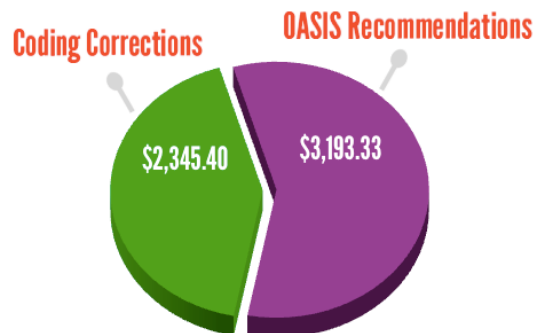

CODING & OASIS BREAKOUT

- 7 of 15 files (47%) had dollar gains due to coding corrections.
- Value of coding corrections: \$ 2,345.40
- 7 of 15 files (47%) had dollar gains due to OASIS recommendations.
- Value of OASIS recommendations: \$ 3,193.99
- 15 of 15 files (100%) had OASIS recommendations that influence outcomes.

RETURN ON INVESTMENT

Cost of service (\$50 per file): \$750
Expected Gain: \$5,539.39
Return on Investment (ROI): 638%
